How To...

**Dry Ice Bubbles**

### Materials

- Boo bubble generator
- Plastic Cup
- Dish soap
- Insulated gloves
- Water
- Dry ice
- Spoon

### Procedure

1. Prepare a 1:8 solution of dish soap to water; stir gently to combine
2. Add warm water to bubble generator until half full
3. Wearing gloves, drop a couple of chunks of dry ice into the bubble generator
4. Screw lid partially onto bubble generator to force fog out of plastic tube
5. Dip unattached end of plastic tube into cup filled with bubble solution
6. When bubbles reach the desired size, shake them gently off of the tubing
