How To...

Paper Airplanes with Lights

Materials

- Sheet of paper
- Flat batteries
- LED light
- Copper tape
- Scotch tape
- Scissors

Procedure

1. Fold paper to make paper airplaine
2. Cut a piece of copper tape to measure half the length of the plane
3. Cut the piece of copper down the middle long ways to make 2 long copper tape pieces.
4. Tape one leg of the LED light to one end of a piece copper on the shiny side.
5. Tape the other leg of the LED light to the other piece of copper on the shiny side.
6. Connect the two loose ends of copper to + and – sides of the battery to close the circuit. At this point the LED light should turn on.
7. Remove the paper backing on copper to attach it to the airplane.
