How To... Seed Bombs

Materials

- Clay
- Water
- Seeds
- Compost
- Large Flat Surface

Procedure

1. Mix 5 parts clay with 1 part compost, and one part seeds [flowers seeds native to your area are the best choice so that they will require very little maintenance].

2. Add a couple drops of water [don’t add too much].

3. Roll and knead mixture into a long log ½ thick.

4. Cut every ¾ inches and make smaller balls.

5. Let the ball dry out in the sun.

6. Toss the seed bombs into open area where you want the flowers to grow.

7. Wait for your seeds to germinate and grow.
