How To...
Straw Rockets

Materials
Light-weight paper
Straws
Tape
Scissors
Markers

Procedure

1. Cut a 8 ½ “ by 11” piece of paper into twelve equal strips by cutting six strips widthwise and then cutting each strip in half.

2. Decorate the each strip.

3. Roll a strip loosely around the straw, and tape the edge of the rolled paper so that you have a thin tube.

4. Fold down one end of the tube and tape it closed. Now you have a thin tube with only one open end.

5. Fit the paper tube over the straw and blow.

6. You’ve successfully made a straw rocket!
